

LOKMATE™: CLIP FASTENING TOOL

The LokMate tool is engineered for electrical installers working on medium and high-voltage power cable systems. When working in overhead pathways, cable trenches, or around densely packed equipment, LokMate delivers a safe, efficient way to fasten BAND-IT clips without compromising cable integrity or installation quality.

Contact us for more information on availability.

Why use it?

- Compact Design: Perfect for tight spaces where standard banding tools cannot fit.
- Ease of Installation: No hammering required - push to fasten!
- One-Handed Operation: Enables quick, efficient fastening in restricted-access areas.
- Tactile Feedback: Confirms completed installation even when visibility is limited.
- Cable Protection: Rounded tool edges prevent damage to cable sheaths during installation.
- Durable Construction: Built for demanding installation environments.
- Weight: Lightweight for easy handling.

Compatible with:

- Stainless Steel Clips
- PPA Coated BAND-FAST Clamps
